Subject Index of Volume 58

Adhesion
factors affecting the adhesion of electroless coatings, 57
influence of Ti interlayers on the adhesion of PVD TiN coatings on oxidized stainless steel substrates, 163
Aluminium
Ti cladding and Ni alloying on pure Al and Al alloys by an electron beam technique, 137
Atomic oxygen coatings
atomic oxygen protective coatings for Kapton film: a review, 1
a-C:H films
mechanical and tribological properties of dual-frequency plasma-deposited diamond-like carbon, 45

Bioceramics
laser surface coating of a bioceramic composite layer, 125
Boron implantation
improvement in fatigue lifetime of Ti–6Al–4V alloy by boron implantation, 119

Carbide-based coatings
characterization of (W,Ti)C–Ni powder for thermal spraying, 173
Chemical vapour deposition
characterization and morphological features of diamond films and particles affected by a diamond-like pre-coated layer, 143
properties and performance of (ZrO_2–8wt.%Y_2O_3)/(chemically vapour-deposited Al_2O_3)/(Ni–22wt.%Cr–10wt.%Al–1wt.%Y) thermal barrier coatings, 93
thermal effects of residual macrostress and microstrain in plasma-assisted CVD TiN films, 37
Cyaniding
surface modification of Ti–6Al–4V alloy by salt cyaniding and nitriding, 79

Diamond films
characterization and morphological features of diamond films and particles affected by a diamond-like pre-coated layer, 143
Diamond-like carbon
mechanical and tribological properties of dual-frequency plasma-deposited diamond-like carbon, 45

Electrocrystallization
invariability of initial strain in TiN coatings deposited by the method of electric arc evaporation in vacuum, 193
Electrodeposition
electrodeposition of thin Pd–Ag films, 179
morphological effects on electrodeposited Pd–Ag films due to the electroplating conditions, 185
NiP electrodeposition on a rotating-disc electrode and in a jet-cell: relationship between plating parameters and structural characteristics, 63
Electroless coatings
factors affecting the adhesion of electroless coatings, 57
Electron diffraction microscopy
laser surface coating of a bioceramic composite layer, 125
Erosion
effect of laser surface melting on the erosion behaviour of a low alloy steel, 85

High frequency induction heating
study of residual stresses in the surface hardening of a blade mould by high frequency induction heating, 129
Hydroxyapatite coatings
characteristics and osteoconductivity of three different plasma-sprayed hydroxyapatite coatings, 107

Laser surface coating
laser surface coating of a bioceramic composite layer, 125
Laser surface melting
effect of laser surface melting on the erosion behaviour of a low alloy steel, 85

Morphology
characterization and morphological features of diamond films and particles affected by a diamond-like pre-coated layer, 143
morphological effects on electrodeposited Pd–Ag films due to the electroplating conditions, 185

Ni alloying
alloying and post-heat-treatment of thermal-sprayed coatings of self-fluxing alloys, 73
Ti cladding and Ni alloying on pure Al and Al alloys by an electron beam technique, 137
Ni electrodeposition
microhardness and roughness in Ni electrodeposition under pulse reversed current conditions, 101
Ni interlayer
wear behaviour in TiN coatings modified by an electroless Ni interlayer on mild steel, 151
Ni plating
corrosion behaviour of electroless Ni plating modified TiN coating, 157
effects of pH values in electroless Ni plating on mild steel with TiN coating, 19
NiP coatings
NiP electrodeposition on a rotating-disc electrode and in a jet-cell: relationship between plating parameters and structural characteristics, 63
Nitriding
surface modification of Ti–6Al–4V alloy by salt cyaniding and nitriding, 79

Osteoconductivity
characteristics and osteoconductivity of three different plasma-sprayed hydroxyapatite coatings, 107

Pd–Ag films
electrodeposition of thin Pd–Ag films, 179
morphological effects on electrodeposited Pd–Ag films due to the electroplating conditions, 185
Physical vapour deposition
an all round performer in the PVD laboratory, 205
influence of Ti interlayers on the adhesion of PVD TiN coatings on oxidized stainless steel substrates, 163
Plasma deposition
mechanical and tribological properties of dual-frequency plasma-deposited diamond-like carbon, 45

Plasma spraying
characteristics and osteoconductivity of three different plasma-sprayed hydroxyapatite coatings, 107
characterization of composite tribological coatings: composition, microstructure and mechanical properties, 199
properties and performance of (ZrO_2–8wt.%Y_2O_3)/(chemically vapour-deposited Al_2O_3)/(Ni–22wt.%Cr–10wt.%Al–1wt.%Y) thermal barrier coatings, 93
Polymeric films
atomic oxygen protective coatings for Kapton film: a review, 1
Pulsed reversed current
microhardness and roughness in Ni electrodeposition under pulse reversed current conditions, 101

Residual stress
study of residual stresses in the surface hardening of a blade mould by high frequency induction heating, 129

Scanning electron microscopy
characterization of composite tribological coatings: composition, microstructure and mechanical properties, 199
improvement in fatigue lifetime of Ti–6Al–4V alloy by boron implantation, 119
laser surface coating of a bioceramic composite layer, 125
Self-fluxing alloys
alloying and post-heat-treatment of thermal-sprayed coatings of self-fluxing alloys, 73
Sputtering
corrosion behaviour of electroless Ni plating modified TiN coating, 157
effects of pH values in electroless Ni plating on mild steel with TiN coating, 19
tribological properties of r.f. sputtered Ti–B–N coatings under various pin-on-disc wear test conditions, 29
wear behaviour in TiN coatings modified by an electroless Ni interlayer on mild steel, 151

Thermal barrier coatings
properties and performance of (ZrO_2–8wt.%Y_2O_3)/(chemically vapour-deposited Al_2O_3)/(Ni–22wt.%Cr–10wt.%Al–1wt.%Y) thermal barrier coatings, 93
Thermal spraying
alloying and post-heat-treatment of thermal-sprayed coatings of self-fluxing alloys, 73
characterization of (W,Ti)C–Ni powder for thermal spraying, 173
Thermal stress
study of residual stresses in the surface hardening of a blade mould by high frequency induction heating, 129
Ti alloys
an all round performer in the PVD laboratory, 205
surface modification of Ti–6Al–4V alloy by salt cyaniding and nitriding, 79
Ti cladding
Ti cladding and Ni alloying on pure Al and Al alloys by an electron beam technique, 137
Ti interlayers
influence of Ti interlayers on the adhesion of PVD TiN coatings on oxidized stainless steel substrates, 163
Ti–Al–V alloys
improvement in fatigue lifetime of Ti–6Al–4V alloy by boron implantation, 119
Ti–B–N coatings
tribological properties of r.f. sputtered Ti–B–N coatings under various pin-on-disc wear test conditions, 29
TiN coatings
corrosion behaviour of electroless Ni plating modified TiN coating, 157
effects of pH values in electroless Ni plating on mild steel with TiN coating, 19
influence of Ti interlayers on the adhesion of PVD TiN coatings on oxidized stainless steel substrates, 163
invariability of initial strain in TiN coatings deposited by the method of electric arc evaporation in vacuum, 193
wear behaviour in TiN coatings modified by an electroless Ni interlayer on mild steel, 151
TiN films
thermal effects of residual macrostress and microstrain in plasma-assisted CVD TiN films, 37
Transmission electron microscopy
improvement in fatigue lifetime of Ti–6Al–4V alloy by boron implantation, 119
Tribological properties
characterization of composite tribological coatings: composition, microstructure and mechanical properties, 199

X-ray diffraction
laser surface coating of a bioceramic composite layer, 125
morphological effects on electrodeposited Pd–Ag films due to the electroplating conditions, 185
